<b>Project Name Reporting<sup>4</sup></b>	<b>12</b>	<b>14</b>	<b>14</b>

<sup>1</sup> The contents of this report are provided in accordance with the requirements of EP4. We voluntarily provide 3-year trends and report on Project-Related Bridge Loans, as well as on Project Name Reporting and loans for renewable energy projects. Figures include Revolving Credit Facilities where the documentation refers to EP compliance for the calendar year in which the RCF was closed, to ensure that these are always captured in our reporting.

<sup>2</sup> Category A – Projects with potential significant adverse environmental and social risks and/or impacts that are diverse, irreversible, or unprecedented; Category B – Projects with potential limited adverse environmental and social risks and/or impacts that are few in number, generally site-specific, largely reversible and readily addressed through mitigation measures; and. Category C – Projects with minimal or no adverse environmental and social risks and/or impacts.

<sup>3</sup> Country Designation is based on the World Bank's income criteria. Projects in designated countries (High Income OECD members) are assessed only according to local laws. Projects in "non-designated" countries are assessed according to local laws and the International Finance Corporation's standards.

<sup>4</sup> Project Name Reporting indicates the number of clients who have agreed that high-level project details can be disclosed on the Equator Principles website.
