

The following is the text of an announcement made today by HSBC Bank Malta plc, a 70.03 per cent indirectly held subsidiary of HSBC Holdings plc.

12 November 2010

HSBC BANK MALTA P.L.C. INTERIM DIRECTORS' STATEMENT

HSBC Bank Malta p.l.c. (HSBC Malta) is required to publish the following Interim Directors' Statement covering the period from 1 July 2010 to 12 November 2010 (the date of the Statement) under Listing Rules 9.51 and 9.53 of the Malta Financial Services Authority.

HSBC Malta's financial performance during the period 1 July 2010 to 12 November 2010 remained satisfactory with revenue and profits continuing the positive trend reported in the first half of the year.

HSBC Malta continues to provide support for its borrowers and security for its depositors. The bank has seen a slight softening in loan demand due to economic conditions, and increasing competition in the market. Deposits increased despite growing competitive pressure, including from a number of local government and corporate bond issues.

Profits from the life insurance business remain volatile, reflecting the downward movement in the Euro yield curve which affects underlying actuarial valuations and impacts the level of reserving.

The bank continued to invest in expanding its business and transforming its operations in the period while maintaining a focus on cost control. As a result, the cost:efficiency ratio was broadly in line with the first half of 2010 and remains well within the bank's target range.

The bank continues to focus on building a high quality asset base for the future and it is encouraging that loan impairments were only modestly higher than the same period last year and in line with expectations. The credit quality of the available-for-sale investments portfolio, which has improved over the period, remains satisfactory.

HSBC Bank Malta Interim Directors' Statement/2

The bank has maintained a strong liquidity position and a stable loans to deposits ratio in the period. The capital ratio remains well above regulatory requirements.

Alan Richards, Director and Chief Executive Officer of HSBC Malta, said: "We are encouraged by the bank's positive performance during the period under review.

Following a good tourist season, the local economy is performing well and we anticipate continued growth for the foreseeable future. However, challenges within the global economy clearly remain. 2011 is likely to see softer growth across Europe not least because of the impact of a number of austerity packages announced across the European region. We will continue to monitor the current situation closely as any slowdown in growth in Europe will inevitably impact the economy in Malta.

"Nonetheless, HSBC has made sustained progress in the period, and we continue to emphasise our competitive advantage as an international bank. We remain well capitalised, liquid and very much open for business."
