# Basis of preparation (1/2)

<b>Actuals</b>	Actual numbers presented are on a reported basis and include the effect of movements in the fair value of HSBC's own debt related to credit spreads
<b>AMG</b>	The Global Asset Management business formed part of GBM in 2010, but has been included in RBWM for the RoRWA targets. Comparative data will be presented to reflect this reclassification in the Interim Report 2011
<b>Asia</b>	Data for 'Asia' comprises the sum of reported figures for the Hong Kong and Rest of Asia-Pacific geographical regions without the elimination of inter-segment items
<b>Composition of the Group</b>	No changes to the composition of the Group have been assumed other than those described in this presentation
<b>Financial targets</b>	Financial targets are prepared on the basis of the Group's accounting policies as set out in the Annual Report and Accounts 2010, and on the basis of tax rates and laws enacted or substantively enacted as at 31 December 2010. The potential effects on HSBC's operations and performance of the Dodd-Frank Act in the US, the deliberations of the UK Independent Commission on Banking, and a range of evolving regulatory changes which may or may not affect HSBC have not been included in the targets
<b>Other</b>	The main items reported under 'Other' are certain property activities, the estimated impact of the UK bank levy, unallocated investment activities, centrally held investment companies, gains arising from the dilution of interests in associates, movements in the fair value of own debt designated at fair value (the remainder of the Group's gain on own debt is included in GBM) and HSBC's holding company and financing operations. The results also include net interest earned on free capital held centrally, operating costs incurred by the head office operations in providing stewardship and central management services to HSBC, and costs incurred by the Group Service Centres and Shared Service Organisations and associated recoveries

## Basis of preparation (2/2)

<b>RoE</b>	Return on equity ('RoE') is profit attributable to ordinary shareholders of the parent company divided by average ordinary shareholders' equity
<b>RoRWA</b>	The metric, return on risk weighted assets ('RoRWA'), is the profit before tax divided by average RWAs. The RWAs have been calculated using FSA rules for the 2010 metrics. The regional and customer group targets are adjusted for Basel 3 rules specific to the GBM business. In all cases, RWAs or financial metrics based on RWAs for geographical segments or customer groups are on a third party basis and exclude intra-HSBC exposures
<b>RoRWA target for Europe</b>	The Europe RoRWA target includes the Group's head office costs, intra-HSBC recharges and the total estimated impact of the UK bank levy
<b>RoRWA target for 'Other'</b>	No RoRWA target has been set for the 'Other' customer group as it is not considered to be a meaningful measure in terms of performance assessment and resource allocation
<b>RWAs for the mainland China associates</b>	RWAs for the mainland China associates have been reallocated from the 'Other' customer group to RBWM, CMB and GBM to align better with the basis for the allocation of their profits. This represents a reclassification from the basis used in HSBC's 2010 Pillar 3 Disclosures. Comparative customer group RWAs will be presented on the new basis in the Interim Report 2011
