## Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

## Explanatory footnotes

The CRR/CRD IV memo items in respect of deferred tax and holdings of CET1 capital instruments of financial sector entities represent gross amounts, disclosed before application of the threshold calculations. Further the holdings of CET1 capital instruments of financial sector entities include the net long positions of non significant investments presented before management actions the Group is planning to undertake to mitigate the potential capital deduction related to these items. After adjusting for mitigating actions and the impact of thresholds the deduction from CET1 related to these items would amount to Euro 298m at 30 June 2013 and Euro 7,495m at 31 December 2012. For a full understanding of the HSBC CRD IV position please refer the HSBC Holdings PLC Interim Report 2013.

#### Explanatory footnotes

The table above represents RWAs at a product level, cross product diversification benefits which are part of the VAR and SVAR calculation and which lower the overall RWAs are therefore not captured in the table above. These cross-product diversification benefits amounted to Euro17,047m at 31 December 2012 and Euro16,691m at 30 June 2013. Trading book securitisation RWAs are not included in the above table, in HSBC's own publications a different disclosure convention is followed, where trading book securitisation RWAs are included within Market Risk RWAs.

### Notes and definitions

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparts with full or partial government guarantees

(2) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(3) The exposures reported include the positions towards counterparts (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparts (other than sovereign) with full or partial government guarantees by central, regional and local governments.

### Notes and definitions

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees

(2) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(3) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments.
