- Regulatory RWA movements include the impact of the PRA-determined 45% sovereign LGD floor; recalibration of the incremental risk charge (IRC) post-management actions; revisions to market risk consolidation; and movements of CRE and IPRE portfolios in parts of North America and parts of Europe from IRB advanced to standardised and standardised to IRB supervisory slotting respectively (see page 300 in the Annual Report and Accounts 2013).
- Business growth in HK and ROAP (Ex-Associates) includes corporate book growth RWA movements in Hong Kong and Rest of Asia-Pacific (excluding Associates) for CMB and GB&M under the IRB approach. Refer to page 301 in the Annual Report and Accounts 2013

Capital adequacy

CRD IV Common equity tier 1 ratio¹ movement (%)

Future developments

- The PRA has given notice it will be implementing floors across a range of portfolios (estimated adverse impact on our CET1 ratio in the range of 25-35bps in 1Q14)
- Transitional requirements estimated to have an approximately 10 bps adverse impact on CET1 ratio for 1 Jan 2014 compared to end point
- Continued uncertainty as numerous EBA technical standards are outstanding and PRA consultation on Pillar 2 and CRD IV capital buffers is delayed until later in 2014.
- Leverage ratio at 4.4% on an end-point PRA-prescribed basis. CRD IV rules to be finalised
- UK and EU structural banking reform will impact Group structure and capital requirements

Notes:

1. Estimated CRD IV end-point CET1 ratio: 2012 is based on the Group's interpretation of the July 2011 draft CRD IV regulation, supplemented by FSA guidance, and is shown post anticipated management action to mitigate capital deductions for non-significant holdings of financial sector entities; 2013 is based on the Group's interpretation of the final CRD IV legislation and final rules issued by the PRA. Refer to Reconciliation of current rules to CRD IV end point rules table on page 311 and basis of preparation on page 324 in the Annual Report and Accounts 2013
2. Regulatory RWA movements include the impact of the following Basel 2.5 movements: PRA-determined 45% sovereign LGD floor; recalibration of the incremental risk charge (IRC) post-management actions; revisions to market risk consolidation; and movements of CRE and IPRE portfolios in parts of North America and parts of Europe from IRB advanced to standardised and standardised to IRB supervisory slotting respectively (refer to page 300 in the Annual Report and Accounts 2013). In addition, the movements include the introduction of exemptions for the CVA risk charge under the final CRD IV rules and other movements in RWAs for residual items following finalisation of the CRD IV rules

First phase strategic achievements, 2011-13

	Objectives	Achievements

Next phase strategic priorities, 2014-16

Grow both business and dividends

Objectives

- Continue to recycle RWAs from lower into higher performing businesses within the Group's risk appetite, in particular, trade, PCM, forex, renminbi internationalisation and in the Pearl River Delta and ASEAN

2016 milestones

- Continue to grow RWAs in line with our organic investment criteria
- Progressively grow dividends and introduce share buy-backs¹ as appropriate
- Reduce impact of Legacy and non-strategic activities on PBT and RWAs

Implement Global Standards

- Continue to invest in best-in-class Compliance and Risk capabilities
- De-risk operations and/or improve risk management in higher risk locations and businesses
- HSBC values – act with courageous integrity

- Significant progress in implementation of Global Standards

Streamline processes and procedures

- Re-design key processes and procedures achieving improvements in service, quality, cost and risk
- Cost savings to provide headroom to invest in growth and Global Standards

- Achieve USD2-3bn additional sustainable savings from 2014 to 2016

Note:

1. Subject to meeting United Kingdom regulatory capital requirements and shareholder approval
